

OPERATIONAL COMPLIANCE MANAGEMENT SOLUTIONS FOR UST OWNERS & OPERATORS

JMM offers a unique database system to handle all UST regulatory compliance needs. JMM's Application Portal for Environmental Compliance (APEC), is an easy-to-use web-based application for your company's environmental compliance information.

By implementing the APEC into your company, you will benefit from:

- Comprehensive and cost-effective solutions
- Streamlined information, accessible 24-hours a day
- Becoming better informed and connected
- Efficient and accurate filing categories
- Eliminating costly physical maintenance and storage

Let JMM take care of your UST related challenges, while you focus on running your business. For more information on Compliance Management and APEC, contact us at (847) 888-0276.

APPLICATION PORTAL FOR ENVIRONMENTAL COMPLIANCE

Imagine not having to search page by page for the test results the inspector needs from 1986. Instead of dealing with the arduous search process, implement the services of JMM Management Group for handling all of your UST-related needs. JMM maintains the nation's largest underground storage tank (UST) operational compliance database containing information on approximately 5,600 retail fuel outlets.

For more information on the APEC database visit our web site at www.jmmmgmt.com.

STAGE I & II VAPOR RECOVERY TRAINING

ORDER ONLINE
www.jmmmgmt.com

Many state regulatory agencies require that owners/operators of gasoline dispensing facilities conduct and maintain records of vapor recovery equipment inspections.

JMM's Stage I & II Vapor Recovery Training Program will educate facility personnel on the proper operation and maintenance of Stage I & II Vapor Recovery systems.

The self-paced training program will allow employees to learn the information without being rushed and can also be used as future reference material.

Finally, a Convenient Training Solution.

IT'S AS EASY AS 1-2-3 . . .

- 1 Take the Course**
Students navigate through the training section of the program at their own pace. Topics include system types, procedures, inspections and record keeping.
- 2 Test Your Knowledge**
In order to receive a certificate of training, students must complete an exam to test their competency on the subject matter, and exam scores are automatically tabulated by the program.
- 3 Get a Certificate**
Students simply mail their exam scores to our office, and certificates of training are issued to students receiving exam scores of 75% or greater.
